

WILDLIFE HABITAT VOLUNTEER WORK PROJECT

UNIT 4A, O'HACO RANCH TANK RESEAL APRIL 14-15th

Work to be Done:

The volunteers will muck out the bottom of the 50,000 gallon tank, grind the sides, dry and clean the tank. Then we will coat the tank with an epoxy coating to reseal the tank.

Items to Bring:

- Gloves
- Rubber Boots
- Long Sleeve Shirt
- Safety Glasses
- Hat
- Sunscreen

Be prepared for cool mornings and possible rain. Old clothes are recommended for those grinding and applying epoxy. Facemasks, grinders, vacuums, gloves, glasses and other needed tools will be provided.

We need approximately 25 hard working volunteers for this project. Families are welcome however projects are potentially dangerous and youth under 18 must be supervised by a parent or guardian.

NOTE: If you have asthma or other respiratory problems this project may not be for you.

Camping and Meals:

Directions from Woods Canyon Lake:

Take FS 300 road to FS 34 Rd. Turn right on FS 34. Go about 21 mile to the Forest Boundary. At the Forest Boundary FS 23 Rd heads to the west. Turn on FS 23. You will go about 3 mile when the road turns into FS 63 road. You will near Chevelon Butte at this point. Follow FS 63 to 63A road about 3.8 miles. Continue on FS 63A for about 1 mile to a gate. Go through the gate about 100 yards there is a road that turns left and heads up a grassy bottom. You go a short distance before the road curves back to the right and climbs up a small rocky ridge.

The GPS coordinates for camp are 34 41.464 110 55.334.

The Arizona Elk Society will be providing meals and refreshments for the Project. Dinner will be served on Friday night, Breakfast, Lunch and Dinner on Saturday and Breakfast and Lunch on Sunday.
